DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-5, 9-11, and 18-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Huang et al (US 2003/0053521).

Regarding claims 1-5, 9-11, and 18-20, Huang, as shown in figures 2-7, teaches a multiband UWB communication system comprising transmitter and receiver in which the transmitter comprises polyphase based multichannel (141), shaped pulse generator (fig. 6, 610) and switch (fig. 6, 620) and receiver comprises down converters (fig. 3, 108) A/D converters and rake receiver (fig. 3, 171) and parallel-to-serial converter (fig. 3, 173). See also paragraphs [0042] – [0052], [0054] – [0059], and [0065] – [0068].

Allowable Subject Matter

3. Claims 6-8, and 12-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References Foerster (US 2004/0047285) and Tewfik et al (US 2004/0141559) are cited because they are pertinent to multiband UWB communication system.
